PROFESSIONAL SUMMARY

A motivated and detail-oriented Management Information Systems graduate seeking a Junior UI Designer role. Possesses a strong foundation in UI design principles, usability, and responsive design, with hands-on experience creating clean and user-friendly interfaces for web and mobile applications using Figma. Eager to contribute creative design solutions, collaborate with development teams, and continuously develop skills in modern UI trends and user-centered design practices.

WORK EXPERIENCE

Full-Stack Web Developer Intern

Fuchsius Pvt Ltd, Sri Lanka

Feb 2025 – Aug 2025

- Designed and developed responsive, user-friendly web interfaces.
- Built and maintained RESTful APIs for seamless client-server communication.
- Managed and structured databases using MongoDB and MySQL to ensure efficiency and scalability.
- Collaborated with cross-functional development teams to deliver end-to-end web solutions.
- Wrote clean, maintainable, and well-documented code following industry best practices.

PROJECT

Happy Tails Pet Clinic Website 2024

This project involved designing complete UI/UX flows for both web and mobile platforms. The system included features such as pet health information management, clinic communication, and administrative dashboards. HTML, CSS, JavaScript, JSP, and Figma were used to develop and design the system.

Way Finder Travelling Mobile App 2024

This mobile application was designed using Flutter and Dart with a strong focus on user-friendly navigation. GPS-based features were integrated for route planning and location-based recommendations. The project emphasized modern UI design and ease of use for travelers.

Research Project – Elephant Railway Accident Prevention 2025

This research project proposed an intelligent system to detect elephants crossing railway tracks. The main objective was to reduce railway accidents and protect wildlife. The study focused on safety, IoT concepts, and solving real-world problems.

- **Safety Equipment E-Commerce Website**

2026

Designed and developed a responsive safety equipment website, combining UI/UX design principles with front-end web development. Created user-friendly layouts, product displays, intuitive navigation, and responsive interfaces for desktop and mobile devices, focusing on usability, visual consistency, and overall user experience.

EDUCATION

BSc in Management Information Systems (Special)

NSBM Green University

Graduated: 2025

School Attend

Ferguson High School

SKILLS

- **UI & Design** – UI/UX Design, Wireframing & Prototyping, User-Centered Design Principles
- **Front-End & App Development** – HTML, CSS, Flutter (Mobile UI Development)
- **Programming & Databases** – Python, MySQL
- **Testing & Quality Assurance** – Selenium (Automated Testing)
- **Project & Professional Skills** – Project Management, Problem Solving, Team Collaboration

CERTIFICATIONS

- Selenium Automation Testing for Beginners
EC-Council
- Python for Beginners University of Moratuwa
- Web Design for Beginners University of Moratuwa
- Certificate in English University of Sabaragamuwa

PERSONAL DETAILS

- **Gender** – Female
- **Languages**
 - English
 - Sinhala
